

Star Butterfly

Star Butterfly is a **sweet, upbeat, free-spirited, fun-loving princess** from the Mewni dimension, who also happens to be **skilled at kicking monster butt and battling evil villains!** She has a real zest for life and is determined not to have a single bad day.

As a tradition in her royal family, on her 14th birthday, her parents, the King and Queen of Mewni, presented her with a **unique heirloom: A one-of-a-kind Royal Magic Wand that possesses great sought after powers!**

In order to master the wand, it can take years of learning, studying and practice. However, Star doesn't have the patience for all that and would rather wave it around, say a few incantations and see what happens! Although her intentions are usually good, things often go awry as she accidentally creates larger problems for herself and others. But, with Star's **can-do, spontaneous and whimsical personality**, she usually finds a way out of even the worst situations.

Nevertheless, Star's parents worried about her not being mature enough to handle her royal duties on Mewni. They sent Star to a private high school in the Earth dimension, hoping she'd learn responsibility and be safe from villains trying to steal her wand before she's able to control it. On Earth, Star Butterfly is a **popular teenage princess warrior and foreign exchange student** all rolled into one!

Star is **adorable, bubbly, very silly, and can't help getting in her own way.** She always tries to see the best in people and likes to make others feel good about themselves. Star tends to act before thinking, and isn't big on boundaries or moderating her tone and can **forget to use her 'inside voice.'** On Earth, she lives with a host family, The Moras, who have a son Star's age named Sol Mora. Sol quickly becomes Star's best friend and tries to guide her from getting into trouble, but most of the time, he's too late. But even when Sol points out that she did something wrong, Star can rationalize and twist a situation in her favor. Not to say that Star's beyond a moment of leveling, homesickness or sadness, she just **tries hard to look on the bright side.** Nevertheless, Star Butterfly is a real teenage girl with real feelings just trying to figure out who she is while not totally pissing off her parents in the process.
